

## LESSON 1 - ASSIGNMENT

1. Determine the roles of ten different organic farming and gardening organisations (based on what you found out in set task 1). (Write no more than one page).
2. Explain how organic crops can be 'certified' as being organic in your country. Write approx 200-300 words.
3. Explain the intended aims of a specific 'permaculture' garden and how these aims were fulfilled or modified (based on what you found out in your set task 4 for this lesson). Write about one page.
4. Explain (in a paragraph for each) and in your own words the following organic growing concepts:
  - sustainable agriculture
  - companion planting
  - composting
  - intercropping
  - biological pest control
  - organic weed control
  - following.
