## Assignment 2

This is just a cover sheet, turn to the next page to continue.

## Assignment 2

---

### Question 1

Submit your plant review sheets for this lesson.

### Question 2

Show the difference between soil management practices used for ten different vegetable varieties, in terms of:

- Fertilising
- Soil preparation
- Cultivation
- Weed control

Present this information in the form of a table.

### Question 3

Explain how each of the following is used in the establishment of vegetables by seed:

- Seed treatments (e.g. coating, soaking)
- Planting techniques

Write a paragraph or two for each.

### Question 4

Explain how to establish three different vegetables from seedlings. State the type of vegetables. Write a paragraph for each.

### Question 5

Prepare a table or chart showing the planting distances and planting depth of seed for twenty different vegetable varieties suitable for growing in your locality. This list should be compiled using the information you have collected as part of your set tasks.

### Question 6

Prepare a list of vegetables commonly planted as divisions, bulbs, rhizomes or tubers. Use bullet points (no more than half a page).

### Question 7

Describe the application of pruning techniques to the production of each of the following three vegetables:

- A tomato
- A cucurbit (e.g. pumpkin, melon)
- One other vegetable of your choice

Write a paragraph for each.

Question 8

Prepare a crop schedule (i.e. production timetable) for a specific vegetable crop of your choice. Put it in a table or write up to half a page using bullet points.
