

Fruit Production - Temperate Climate

Assignment 5

This is just a cover sheet, turn to the next page to continue.

Assignment 5

Question 1

Submit your plan for setting up a berry growing area (from your set task). It can be very small, or larger as you wish. Determine the number of plants you will need to buy for your site (given its area) and the type of planting system you have decided to use. Where will you obtain them and what will be the total cost? Submit approx. 2 pages.

Question 2

Briefly explain (in a paragraph or two) which parts of your region would be most suited to growing grapes? Why?

Question 3

What vine and nut fruits would be suitable to grow in your locality?

Question 4

Briefly outline what nut and vine fruits (studied in this lesson) would be totally unsuitable to grow in your locality (if any) and why.

Question 5

Select two different vine or nut fruits you are particularly interested in (and have not already covered in previous lessons), and write up to half a page on each, in point form, detailing how to grow them in your locality.
