

Organic Plant Culture

Assignment 1

This is just a cover sheet, turn to the next page to continue.

Assignment 1

Question 1

Determine the roles of ten different organic farming and gardening organisations (based on what you found out in set task 1). (Write no more than one page).

Question 2

Explain how organic crops can be 'certified' as being organic in your country. Write approx 200- 300 words.

Question 3

Explain the intended aims of a specific 'permaculture' garden and how these aims were fulfilled or modified (based on what you found out in your set task 4 for this lesson). Write about one page.

Question 4

Explain (in a paragraph for each) and in your own words the following organic growing concepts:

- sustainable agriculture
- companion planting
- composting
- intercropping
- biological pest control
- organic weed control
- fallowing.
